BACHELOR OF SCIENCE
IN PUBLIC HEALTH – HEALTH STUDIES

21% increase in demand for public health workers by 2022.

Public health is the science of preventing disease, promoting health, and prolonging life within entire populations. These populations can be as small as a neighborhood or community, or even as big as a country or region of the world. Unlike clinicians who treat patients individually after they become sick, public health professionals work to identify the root causes of health problems, and then implement large-scale solutions to prevent injury or illness. Although the field of public health is vast with many opportunities to find your niche, public health professionals:

- Monitor health
- Identify and investigate health problems
- Conduct research to enhance prevention
- Advocate for, develop, and evaluate public health policies
- Implement prevention strategies
- Promote healthy behaviors and environments

The Bachelor of Science in Public Health provides a foundation in the core areas of public health and focuses on addressing health disparities.

WHY UNCG
- Recognized as a top 3 Best Online College
- Original UNC institution
- Faculty who know the workplace
- Accredited by the Southern Association of Colleges and Schools (SACS)

APPLICATION REQUIREMENTS
- AA, AS, BA or BS degree
- Minimum cumulative GPA of 2.5

* Outside North Carolina means education is received in a state other than North Carolina. Most students not living in North Carolina will fall into this category.

TESTIMONIALS

“Even though my classes were online, there was consistent communication and detailed support.”

“UNCG’s BS in Public Health fully prepared me for the Master’s of Public Health I’m now pursuing.”
